INTRODUCTION

Hello! I'm Evaleen Whelton,
founder of AUsome Training.

I discovered I am Autistic in
2014 and since then I have
been facilitating **meaningful
action for our marginalised
community**.

It's been quite the journey
and I want to share it with
you, so that together, we
can work towards impactful
change.

The Autistic Community is a
**vibrant, rich and interesting
community** who have had a
medical model imposed on
us. We are a community
**recovering from a lifetime
of collective trauma**.

It's time for change.
Let's support the Autistic
Community together.

MENTORS

It is often difficult to put into words the way our Autistic trainers **guide people to engage with and serve our community**. Our courses create emotional spaces where our mentors and course participants share in the vulnerability of **addressing our biases**, of **reframing our thinking** and **understanding what acceptance truly means**.

NEURODIVERSITY

Much like biodiversity, neurodiversity means we have many different kinds of thinkers in the world. But our interpretation of neurodiversity doesn't end there. To us it means that there is a **beauty in the diversity of humankind** and how we each sense, feel, think, learn, create and come to meet each other. **When we talk about neurodiversity we mean equity.**

WHAT IS **neuro-affirmative** PRACTICE?

- It understands the depths of our community's trauma and **centres the rights and dignity** of Autistics
- It expands **beyond the medical model** into social, minority stress and human rights models
- It is **respectful** and **supportive** of the client's neurotype and neuroculture
- It **values lived experience** and is guided by the community it serves
- It is **reflective** and **continual**
